Management Analyst, #120-7 Task List

General: Under the direction of the Business and Strategic Planning Officer (BSPO), develops and manages cooperate-wide business metrics and analytics utilized to demonstrate the health of the organization and forecasts business trends, identifies threats and opportunities, and recommends action for improvement. Works with BSPO and Executive Steering Committee (ESC) to identify, formulate, and evaluate the Command's future Strategic Plans, goals, initiatives, strategic options and alternatives, and areas for continuous process improvements.

1. Conducts organizational studies to understand work methods, procedures and reporting, to collect vital business information required to develop and maintain cooperate-wide business metrics, other analytics and reports in order to demonstrate the comprehensive health of the organization and identifies strengths, weaknesses, opportunities, and threats. Works with higher level management and subject matter experts across the command to understand all analytical discoveries. Works as a team leader and/or member to identify deficiency root causes, recommend solution, and project/determine future Strategic options and alternatives.

- a. Researches a wide variety of organizational structures to understand the importance of each functional area, how they operate, how they overlap, how they impact other work processes and products, and how each contributes to the success of organization's mission.
- b. Understands the various customers and services provided, as well as adherence to governing policies.
- c. Studies work problems and procedures. Interviews personnel and conducts on-site observation to understand organizational structure and functions, work performed, methods, equipment, and personnel involved. Identifies barriers including managerial inefficiencies.
- d. Determines the vital elements that drive the organization and identifies the key business indicators to show operating success, problems, effectiveness, and inefficiencies.
- e. Works with ESC, BSPO and the Continuous Improvement Director to direct Lean events and steer the Command Strategic Plan's future focus.
- f. Drives organizational change through the formulation and measurement of targeted goals.
- g. Conducts training to ensure goals and targets are communicated and understood across the various work structures within the Command.
- h. Uses various Business Intelligence tools to monitor change performance and organizational success.

2. Designs, develops and maintains Business Intelligence tools. Serves as Systems Data Administrator supporting both C1201A and C1201B. Understands the Command's Automated Information System (AIS) data structures to (data) mine and extracts the correct data and create programming variants required to produce accurate metrics. Prepares for transition to new AIS enterprise system: understands new data formats for data mining and reporting changes. Continuously improves C1201 programs to new formats and builds new reports and metrics as required for Code 1201 processes and products including Business Intelligence tools..

- a. Designs, documents, develops and maintains Business Intelligence tools. Establishes structure and logical data relationships.
 - b. Develops processes and standard operating procedures to include data file formats.
 - c. Develops user manuals and instructions utilized to train users on Business Intelligence functionality and intended use.
 - d. Maintains the database to incorporate current and future business requirements of the organization and its customers.
 - e. Ensures consistent integration of meaningful data and/or recommends changes to the format of the data being evaluated.
 - f. Resolves programming issues for the division and independently leads special studies or coordinates the work of others in evaluating existing programs/databases in order to fine tune/streamline system performance.
 - g. Captures data from various sources and IT systems. Participates in the design of (data) mining and understands present and future data warehousing systems.
 - h. Uses enhanced ACCESS techniques, formulates metric algorithms and builds tables, and complex queries and reports. Provide guidance and instruction to other analysts.
3. Performs other incidental and related duties as assigned.
